

# Tip Calculator

*Beginner Project Plan*

**Date:** 02/11/2021

## Scenario:

You are out with friends or family grabbing food to eat and everyone decides to split the bill including tip

## Your App Should Do The Following:

- Generate a tip calculator to figure the tip amount based of total amount
- Determine if the service was good, ok bad etc.
- Generate an amount of tip to leave depending on service
- Have it able to split with however many people want to share the bill
- Have a HTML, CSS & Javascript files
